#### Projects:

- **Weather App:** I developed a dynamic and user-friendly Weather App to provide real-time weather information for different cities. The project incorporates HTML, CSS, and JavaScript to create an interactive interface. The design is responsive, ensuring a seamless experience across various devices.
  1. Weather Data Retrieval: Utilized the OpenWeatherMap API to fetch current weather data for a specified city.
  2. Error Handling: Implemented robust error handling to manage scenarios where the entered city is not found, enhancing the app's reliability.
- **Ecommerce web app with API map integration:**
  1. Developed and designed the "Re Earth" website, focusing on simplifying recycling practices and promoting smart sustainability.
  2. Utilized HTML, CSS, and integrated the Font Awesome library for iconography to create a visually appealing and user-friendly interface.
  3. Implemented an intuitive navigation bar with links to Home, Learn, Price, and Contact sections, enhancing user experience.
  4. Created a comprehensive footer with social media icons and contact information for easy access.
  5. Demonstrated proficiency in front-end development, user interface design, and effective communication of environmental initiatives through a visually appealing and informative website.

#### Miscellaneous Projects:

- Tic tac toe web app
